

Amendment "B"

Amendments to the claims

Please add new claims 37 and 38, and amend claims 7, 10 and 17, as follows:

Claims 1-6 (cancelled).

Claim 7 (currently amended). An imaging media cartridge comprising:

a first imaging media reservoir chamber;

a second imaging media reservoir chamber; and

a removable barrier disposed between the first imaging media reservoir chamber and the second imaging media reservoir chamber; and

wherein:

the first imaging media reservoir chamber is defined by a first volume;

the second imaging media reservoir chamber is defined by a second volume; and

~~the second volume is ten percent or less of the first volume.~~

the first and second imaging media reservoirs contain respective volumes of a mutually common composition of imaging media.

Claims 8-9 (cancelled).

(Continued on next page.)

1 Claim 10 (currently amended). An imaging media cartridge comprising:
2 a first imaging media reservoir chamber;
3 a second imaging media reservoir chamber; and
4 a removable barrier disposed between the first imaging media reservoir
5 chamber and the second imaging media reservoir chamber;
6 and wherein:
7 the first chamber contains a first volume of an imaging media of a
8 predetermined composition;
9 the second chamber contains a second volume of the same imaging
10 media as the imaging media contained in the first chamber; and
11 the second volume of the imaging media is at least ~~less about~~ ten
12 percent less than of the first volume of the imaging media.

13
14 Claim 11 (previously presented). An imaging media cartridge comprising:
15 a first imaging media reservoir chamber;
16 a second imaging media reservoir chamber;
17 a distribution chamber;
18 an imaging media distribution device configured to extract imaging media from
19 the distribution chamber;
20 a first removable barrier disposed immediately between the first imaging
21 media reservoir chamber and the distribution chamber;
22 a second removable barrier disposed immediately between the distribution
23 chamber and the second imaging media reservoir chamber; and
24 wherein the first removable barrier and the second removable barrier are
25 configured to be separately removable.

(Continued on next page.)

1 Claim 12 (original). The imaging media cartridge of claim 11, and wherein:
2 the first imaging media reservoir chamber contains a first volume of imaging
3 media;
4 the second imaging media reservoir chamber contains a second volume of
5 imaging media; and
6 the distribution chamber does not contain imaging media.

7
8 Claims 13-16 (cancelled).

9
10 Claim 17 (currently amended). A toner cartridge comprising:

11 a first toner reservoir chamber;
12 a second toner reservoir chamber;
13 a distribution chamber; and
14 wherein:

15 the first toner reservoir chamber and the second toner reservoir
16 chamber are configured to be in communication with one another via the
17 distribution chamber; and

18 the first toner reservoir chamber and the second toner reservoir
19 chamber contain respective volumes of a mutually common composition of
20 toner.

21
22 Claim 18 (previously presented). The toner cartridge of claim 17, and further
23 comprising a toner distribution device configured to extract toner from the distribution
24 chamber.

25
Claims 19-22 (cancelled).

1 Claim 23 (previously presented). The imaging media cartridge of claim 7, and
2 wherein the removable barrier comprises a strip of tape.

3
4 Claim 24 (previously presented). The imaging media cartridge of claim 23, and
5 further comprising a pull tab attached to the strip of tape.

6
7 Claim 25 (previously presented). The imaging media cartridge of claim 7, and further
8 comprising an imaging media passageway defined between the first imaging media
9 reservoir chamber and the second imaging media reservoir chamber, and wherein
10 the removable barrier comprises a rigid member configured to move from a first
11 position wherein the removable barrier is disposed within the imaging media
12 passageway to a second position wherein the removable barrier is not disposed
13 within the imaging media passageway.

14
15 Claim 26 (previously presented). The imaging media cartridge of claim 25, and
16 further comprising a thumb switch connected to the rigid member.

17
18 Claim 27 (previously presented). The imaging media cartridge of claim 7, and
19 wherein the imaging media cartridge is a dry toner cartridge.

20
21 Claim 28 (previously presented). The imaging media cartridge of claim 7, and
22 wherein the imaging media cartridge is liquid ink cartridge.

23
24 (Continued on next page.)
25

1 Claim 29 (previously presented). The imaging media cartridge of claim 7, and
2 wherein the removable barrier is a second removable barrier, the imaging media
3 cartridge further comprising:

4 a distribution chamber;

5 an imaging media distribution device configured to extract imaging media from
6 the distribution chamber; and

7 a first removable barrier disposed between the first imaging media reservoir
8 chamber and the distribution chamber.

9
10 Claim 30 (previously presented). The imaging media cartridge of claim 29, and
11 wherein the distribution device is an optical photoconductor.

12
13 Claim 31 (previously presented). The imaging media cartridge of claim 7, and further
14 comprising a cartridge body which defines the first imaging media reservoir chamber
15 and the second imaging media reservoir chamber.

16
17 Claim 32 (previously presented). The imaging media cartridge of claim 12, and
18 wherein the imaging media comprises a dry toner.

19
20 Claim 33 (previously presented). The imaging media cartridge of claim 32, and
21 wherein the imaging media distribution device comprises an optical photoconductor.

22
23 (Continued on next page.)
24
25

1 Claim 34 (previously presented). A liquid ink cartridge, comprising:

2 a cartridge body;

3 a first bladder supported within the cartridge body and defining a first ink
4 reservoir;

5 a second bladder supported within the cartridge body and defining a second
6 ink reservoir; and

7 a removable barrier disposed between the first and second bladders and
8 configured such that when the removable barrier is in position between the bladders,
9 the bladders are not in fluid communication, and when the removable is removed
10 from between the bladders, the bladders are in fluid communication.

11
12 Claim 35 (previously presented). The liquid ink cartridge of claim 34, and further
13 comprising a print head in fluid communication with the first bladder.

14
15 Claim 36 (previously presented). The liquid ink cartridge of claim 34, and wherein
16 the removable barrier is defined by a first end protruding from the cartridge body and
17 which defines a button, and wherein the button is biased away from the cartridge
18 body by a compliant member.

19
20 (Continued on next page.)
21
22
23
24
25

1 Claim 37 (new). An imaging media cartridge comprising:
2 a first imaging media reservoir chamber;
3 a second imaging media reservoir chamber;
4 an imaging media passageway defined between the first imaging media
5 reservoir chamber and the second imaging media reservoir chamber;
6 a removable barrier disposed between the first imaging media reservoir
7 chamber and the second imaging media reservoir chamber, wherein the removable
8 barrier comprises a rigid member configured to move from a first position wherein
9 the removable barrier is disposed within the imaging media passageway to a second
10 position wherein the removable barrier is not disposed within the imaging media
11 passageway; and
12 a thumb switch connected to the rigid member;
13 and wherein:
14 the first imaging media reservoir chamber is defined by a first volume;
15 the second imaging media reservoir chamber is defined by a second
16 volume; and
17 the second volume is ten percent or less of the first volume.

18
19 Claim 38 (new). The imaging media cartridge of claim 7, and wherein the second
20 volume is ten percent or less of the first volume.

21
22 (End of Amendment "B".)
